

CopyTrans Photo – Browse Photos

Browse iPod, iPhone & PC photos

CopyTrans Photo has been designed to help you browse your iPod & PC photos in a simple and intuitive way. Adjust thumbs size, navigate through PC folders, hide windows, change interface background colors and more! Remember, CopyTrans Photo is fully compatible with all iPod photo models, including iPhone & iPod Touch!

Browse iPod & PC pictures

CopyTrans Photo helps you navigate through your iPod and PC photos. Use the left hand side albums on the iPod side to browse your iPod pictures. The folder shortcuts on the PC side, allow you to rapidly access to your computer pictures. Finally, the Explorer lets you open, create & add new folders to your PC.

Show and hide windows

For a single window view, click on any of the buttons circled in blue. To hide the explorer, just click on the "Explorer view" button. To see it again, click once more.

Adjust thumbnail size

To adjust the photo size, use the thumbnail resizing bar, press Ctrl + scroll-wheel or Ctrl + Pg Up / Pg Down.

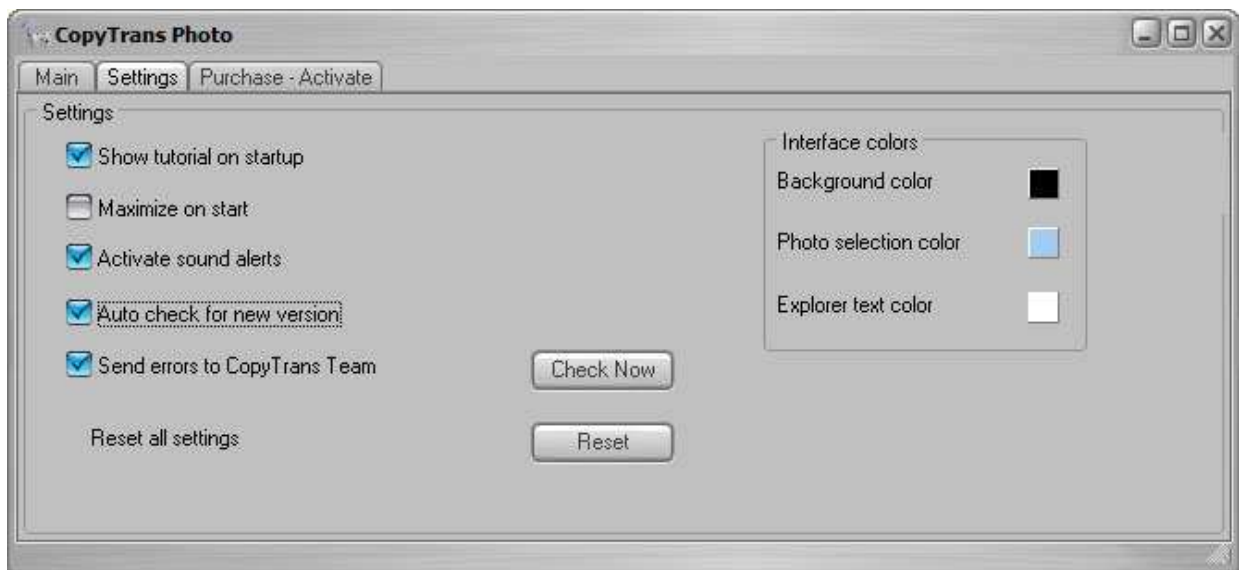

Double click on a picture to have a full size view. Turn it & display the previous and following photos.

Change CopyTrans Photo Settings

To customize CopyTrans Photo's settings, click on the "Settings" tab. Check for new versions of the program, show tutorial on startup, activate sound alerts, etc.

That's all! Easy, isn't it? You can now fully enjoy CopyTrans Photo!
