

iCloner creates iPod backup copies in case of iPod problems!

iCloner allows you to create backup copies of your iPod hard drive in case your iPod crashes, gets stolen or lost and if you want to move your iPod contents from the old iPod to the new iPod. With iCloner, you create exact copies of your iPod hard drive that you can store on DVD/CD and external hard drives. iCloner features archive compression to save up space (up to 50% saving). Backups can be restored at any moment in just a click.
